Mississippi Land Values

Mississippi farm real estate values, the measurement of all land and buildings on farms, averaged \$2,230 per acre on January 1, 2008, up 7 percent from 2007. The \$2,230 per acre is a record high and \$150 more than a year earlier. Both cropland and pasture values for 2008 are record highs. Cropland values rose by 7 percent to \$1,940 per acre, up from the previous high of \$1,810 in 2007. Pasture value rose by 6 percent to \$2,360 per acre.

Survey Procedures: The estimates of land values in the following table are based primarily on the June Area Survey, conducted during the first 2 weeks of June. This annual survey uses a complete, probability-based land-area sampling frame. In 2008, the survey conducted in Mississippi included a stratified sample of 298 land areas (segments), averaging approximately 1 square mile in size. Enumerators collecting data for the June area survey contact all agricultural producers operating land within the boundaries of the sampled land segments and record land value information for crop and pasture land within these segments. They also collect an estimated value of all land and buildings for the operator's entire farming operation and the estimated percent change from the previous year. Survey reported data are reviewed for reasonableness and consistency by comparing with other data reported in the survey and with data reported within the segment the previous year.

Farm Real Estate, Cropland and Pasture, Average Value per Acre,
